Job Application Management — Reports Suite

Aim

To design and configure different types of reports in Zoho Creator for the Job Application Management application, demonstrating the use of report views to organize candidate information, track application status, schedule interviews, and analyze recruitment data for HR administrators and hiring managers.

Reports Used Overview

Report Type	Report Name	Purpose / Key Configuration
List View	All_Job_Applications	Displays candidate details, contact information, department, and employment type in a searchable list.
Spreadsheet View	Applications_Spreadsheet	Provides a grid-style view for reviewing and updating candidate screening and interview details.
Kanban View	Application_Status_Kanban	Groups applications by recruitment status, such as Applied, Screening, Interview, Offer, and Rejected.
Calendar View	Interview_Schedule_Calendar	Displays scheduled interviews based on interview dates.
Map View	Candidate_Location_Map	Displays candidates' locations using their address information.
Timeline View	Application_Activity_Timeline	Presents application-related activities chronologically using available date fields.
Pivot Table	Department_By_EmploymentType_Pivot	Compares departments and employment types to analyze candidate distribution.
Chart View	Department_Applications_Chart	Visualizes the number of applications received by each department.
Summary View	Department_Wise_Summary	Groups applications by department and summarizes recruitment information.

Detailed Report Descriptions

1. All_Job_Applications (List View)

- Purpose: Displays all candidate applications in a simple tabular format for HR administrators.
- Features: Shows candidate name, current address, contact number, email address, department applied for, and employment type. It supports searching, filtering, and sorting candidate records.

2. Applications_Spreadsheet (Spreadsheet View)

- Purpose: Helps HR staff review multiple candidate records in a spreadsheet-style layout.
- Features: Provides a grid view for reviewing application details and updating permitted screening status, interview round, and interviewer assignment fields.

3. Application_Status_Kanban (Kanban View)

- Purpose: Provides a visual representation of the recruitment process.
- Features: Groups candidate applications into Applied, Screening, Interview, Offer, and Rejected stages to simplify application tracking.

4. Interview_Schedule_Calendar (Calendar View)

- Purpose: Helps HR administrators and interview panels manage interview schedules.
- Features: Displays interview records according to scheduled interview dates, helping users identify upcoming interviews and avoid scheduling conflicts.

5. Candidate_Location_Map (Map View)

- Purpose: Helps the recruitment team understand the geographical distribution of candidates.
- Features: Displays candidate locations using address information when supported by the configured map report.

6. Application_Activity_Timeline (Timeline View)

- Purpose: Provides a chronological view of application activities.
- Features: Uses available submission dates or other relevant date fields to help HR monitor the flow of candidate applications over time.

7. Department_By_EmploymentType_Pivot (Pivot Table)

- Purpose: Summarizes candidate applications according to department and employment type.
- Features: Organizes application data into a cross-tabulated view to compare Full-Time, Part-Time, and Internship applicants across departments.

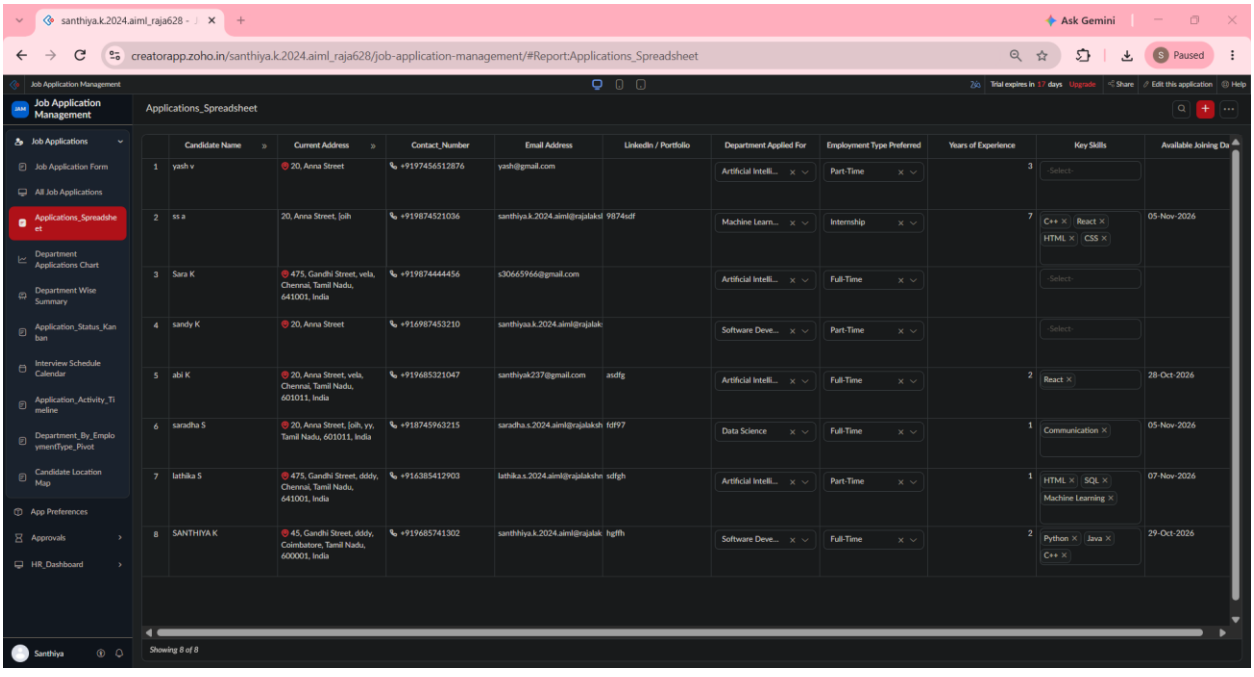

8. Department_Applications_Chart (Chart View)

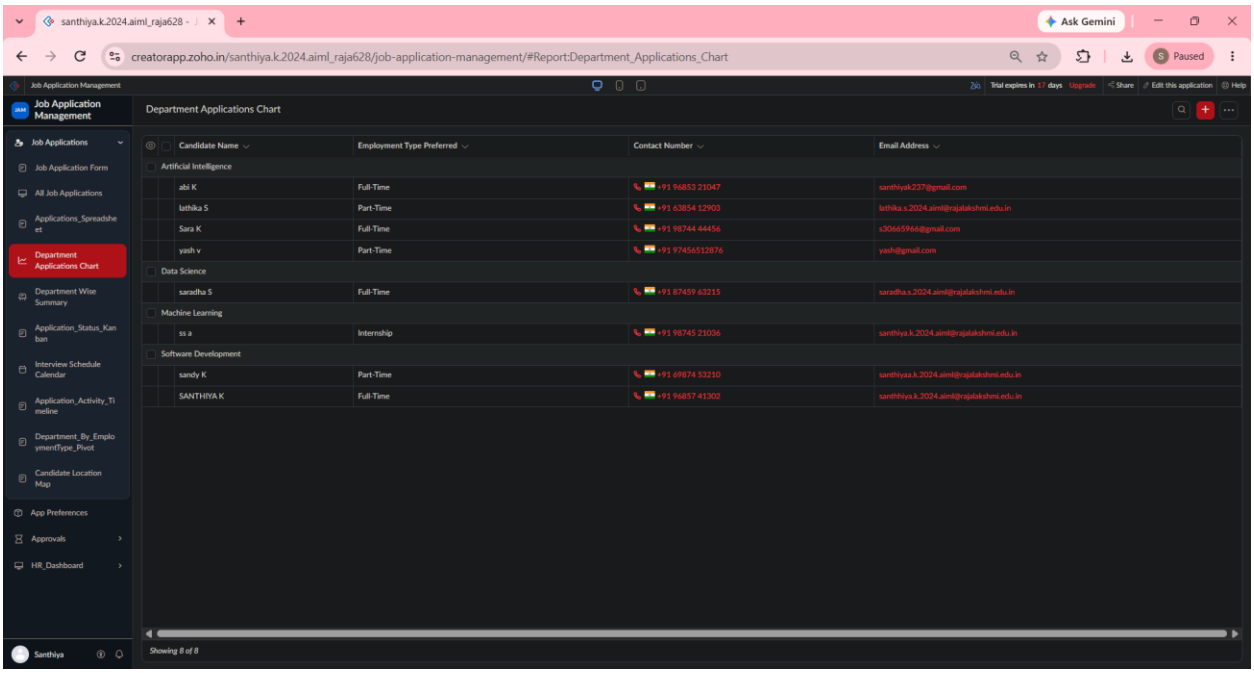

- Purpose: Provides a graphical representation of application distribution across departments.
- Features: Uses a chart to compare application counts for departments such as Artificial Intelligence, Machine Learning, Data Science, and Software Development.

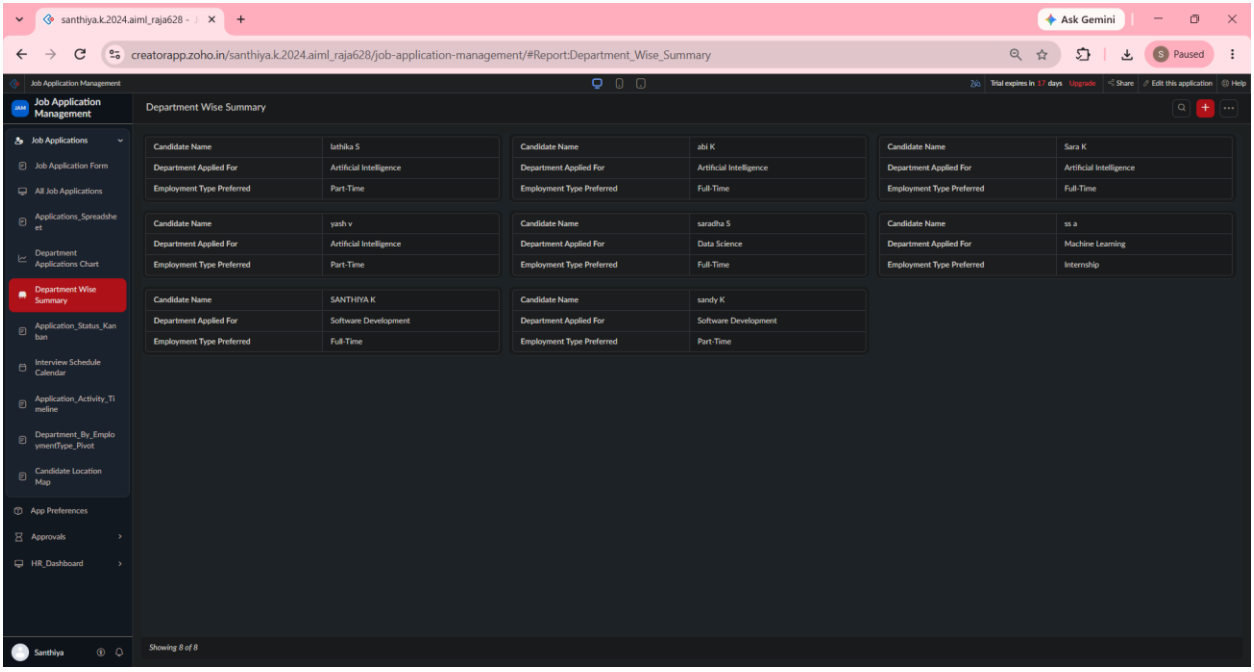

9. Department_Wise_Summary (Summary View)

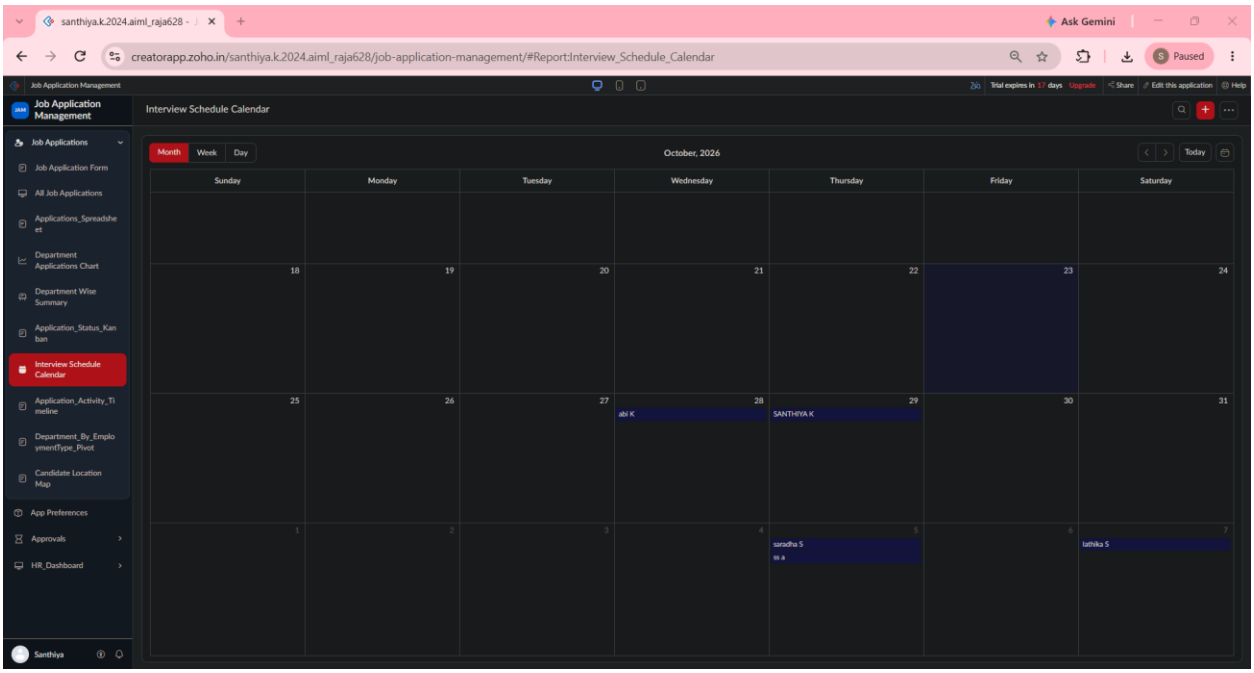

- Purpose: Provides a consolidated summary of recruitment data for each department.
- Features: Groups applications by department and summarizes available information to support recruitment planning and decision-making.

Result

Thus, the Job Application Management report suite was configured in Zoho Creator to organize candidate application details, monitor recruitment stages, manage interview schedules, and analyze department-wise application data. These reports help HR administrators and hiring managers manage the recruitment process more efficiently.
