Experiment 6: Job Application Automation Suite — Workflow Options Use Case

Aim

To design and configure workflow automation in Zoho Creator for the Job Application Management application using workflow options to automate application submissions, interview reminders, offer approvals, recruitment status tracking, and candidate-related activities.

Workflow Options Used Overview

S.No.	Workflow Option	Workflow Name	Purpose	Trigger
1	Form Workflows	New Job Application Workflow	Automates actions after a new job application is submitted.	Successful form submission
2	Schedules	Daily_Interview_Reminder_Schedule	Automates scheduled interview reminder activities.	Scheduled execution
3	Approvals	Job_Offer_Approval	Manages job offer approval requests.	According to approval configuration
4	Payments	Referral_Bonus_Payout_Workflow	Handles referral bonus payment-related activities.	On collecting payment
5	Blueprints	Application Lifecycle Blueprint	Controls candidate progress through recruitment stages.	Based on blueprint transitions
6	Batch Workflows	Bulk_Rejection_Notification_Batch	Processes rejection-related actions in batches.	On schedule
7	Report Workflows	OnEdit_Recalculate_CTC_Workflow	Executes actions when a report record is edited.	User-triggered report edit
8	Functions	Update_Application_Status_Function	Performs reusable application updates using Deluge scripting.	Invoked through a configured workflow or action

The first seven names are based on the workflow entries visible in your screenshot. The function name is suggested because a separate function entry was not visible.

Automation Details and Workflow Breakdown

1. Form Workflows — New Job Application Workflow

- Purpose: Automates actions when a candidate submits a new job application.
- Process: Executes configured actions after successful form submission.
- Benefit: Reduces manual work and helps HR process applications efficiently.

2. Schedules — Daily_Interview_Reminder_Schedule

- Purpose: Automates interview-related activities.
- Process: Runs according to the configured schedule to check upcoming interviews and send reminders if the email action is configured.
- Benefit: Helps candidates and interviewers prepare for scheduled interviews.

3. Approvals — Job_Offer_Approval

- Purpose: Manages the job offer approval process.
- Process: Routes applications for review according to the configured approval rules.
- Benefit: Ensures that job offers follow the required approval procedure.

4. Payments — Referral_Bonus_Payout_Workflow

- Purpose: Manages referral bonus payment-related activities.
- Process: Executes configured actions when the payment collection trigger occurs.
- Benefit: Helps organize referral-related financial transactions.

5. Blueprints — Application Lifecycle Blueprint

- Purpose: Controls the candidate recruitment lifecycle.
- Process: Defines transitions between application stages, such as Applied, Screening, Interview, Offer, Hired, and Rejected, according to the configured blueprint.
- Benefit: Maintains a consistent and organized recruitment process.

6. Batch Workflows — Bulk_Rejection_Notification_Batch

- Purpose: Handles rejection-related actions for multiple candidate records.
- Process: Processes eligible records according to the configured batch workflow and schedule.
- Benefit: Reduces repetitive manual work when handling multiple applications.

7. Report Workflows — OnEdit_Recalculate_CTC_Workflow

- Purpose: Automates actions when application records are edited through a report.
- Process: Executes configured actions following a report edit.
- Benefit: Helps keep candidate and salary information updated.

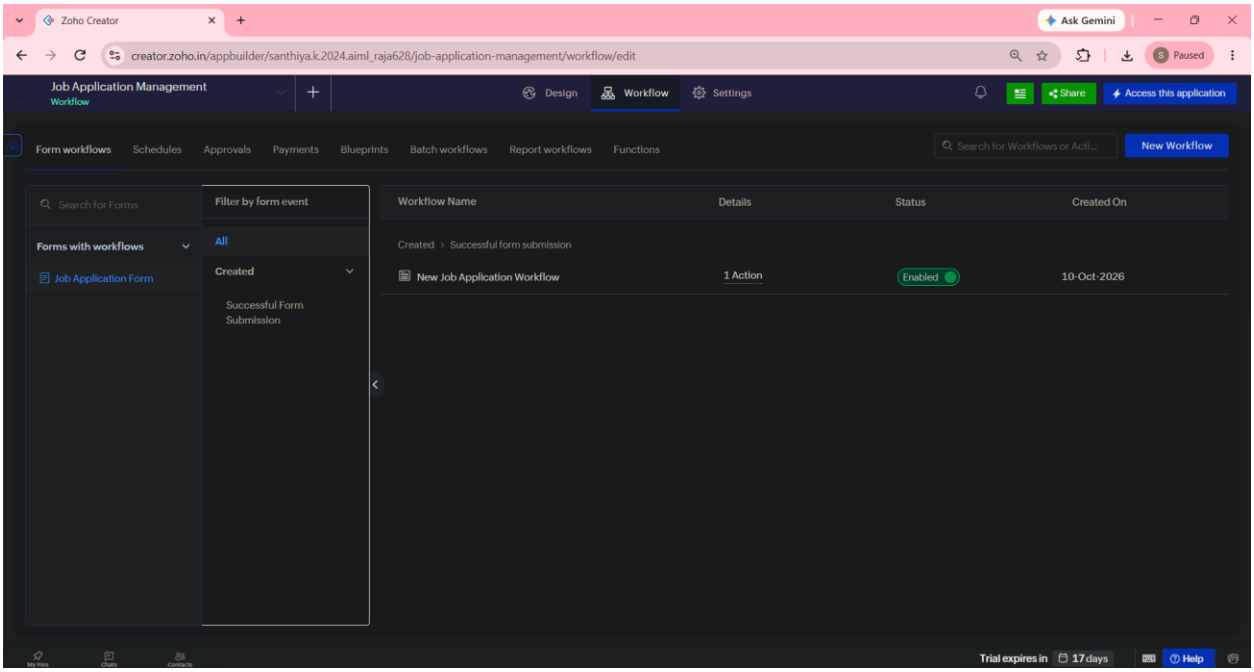

8. Functions — Update_Application_Status_Function

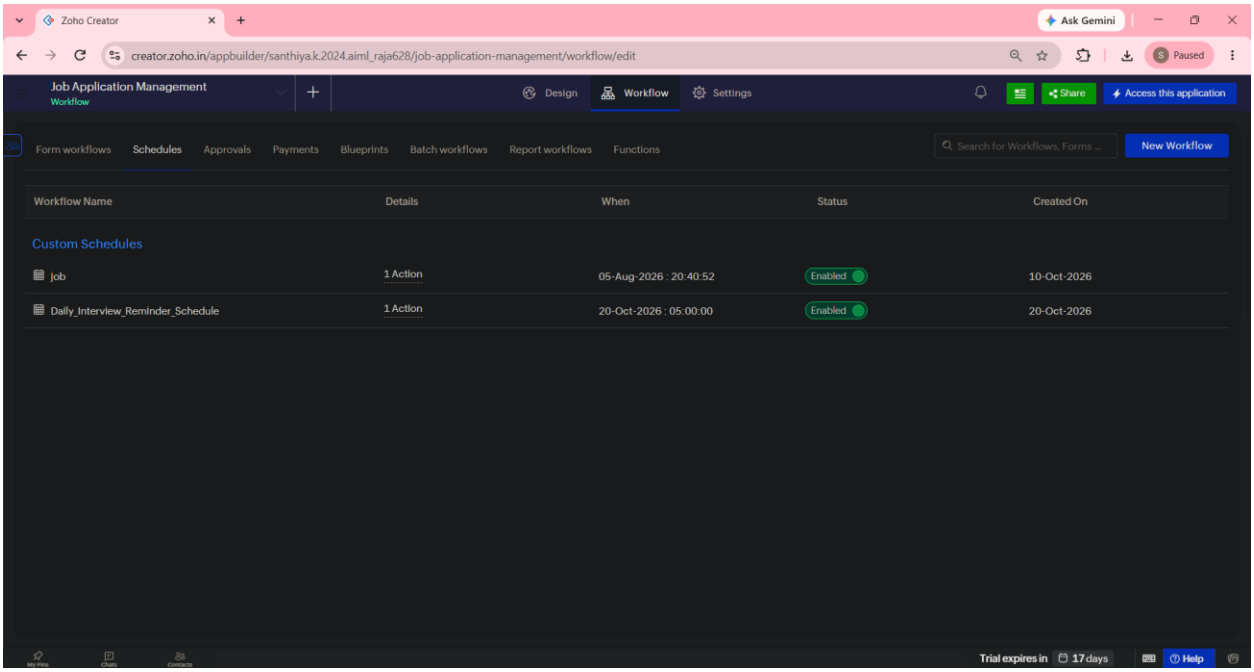

- Purpose: Provides reusable logic for updating candidate application information.
- Process: A Deluge function can validate application details, update recruitment status, or perform other configured actions when called by a workflow or button.
- Benefit: Improves code reusability and simplifies application maintenance.

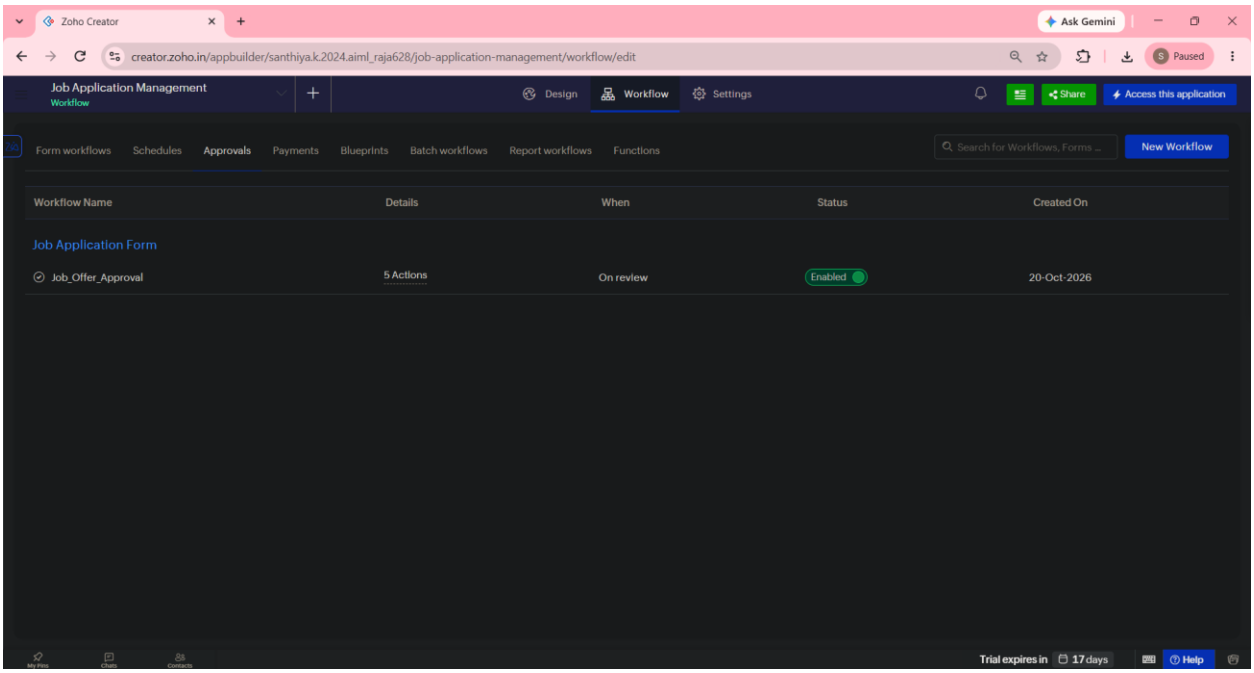

Procedure

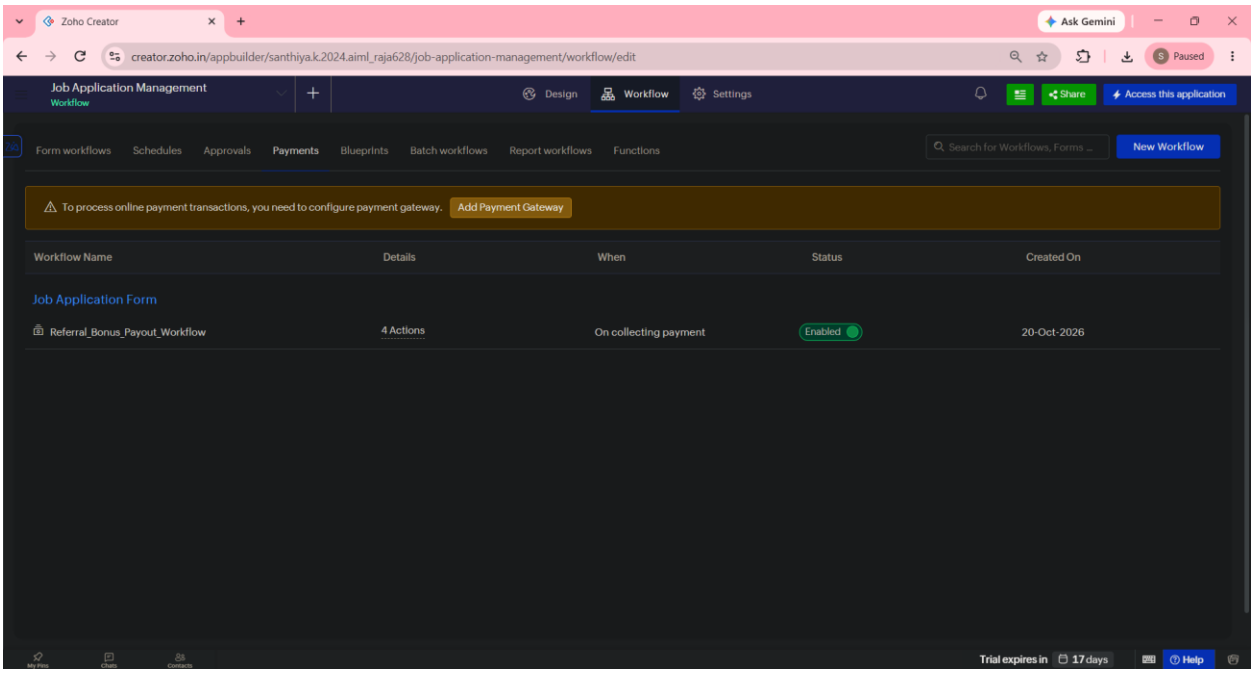

1. Open the Job Application Management application in Zoho Creator.
2. Navigate to the Workflow section.
3. Configure the New Job Application Workflow for form submission.
4. Configure Daily_Interview_Reminder_Schedule for scheduled interview activities.
5. Set up Job_Offer_Approval for offer approval management.
6. Configure Referral_Bonus_Payout_Workflow for referral-related payment activities.
7. Set up Application Lifecycle Blueprint to manage recruitment stages.
8. Configure Bulk_Rejection_Notification_Batch for batch processing.
9. Configure OnEdit_Recalculate_CTC_Workflow for report-edit automation.
10. Create Update_Application_Status_Function if the Functions option is required, and define its Deluge logic.
11. Save the configurations and test the workflows using sample application records.

Result

Thus, the Job Application Automation Suite was configured and documented for the Job Application Management application in Zoho Creator. The workflows support application submission, interview scheduling, offer approvals, recruitment status management, referral-related payments, batch processing, report updates, and reusable functions.
