EXP.NO: 2	Zoho Creator Setup and Platform Exploration

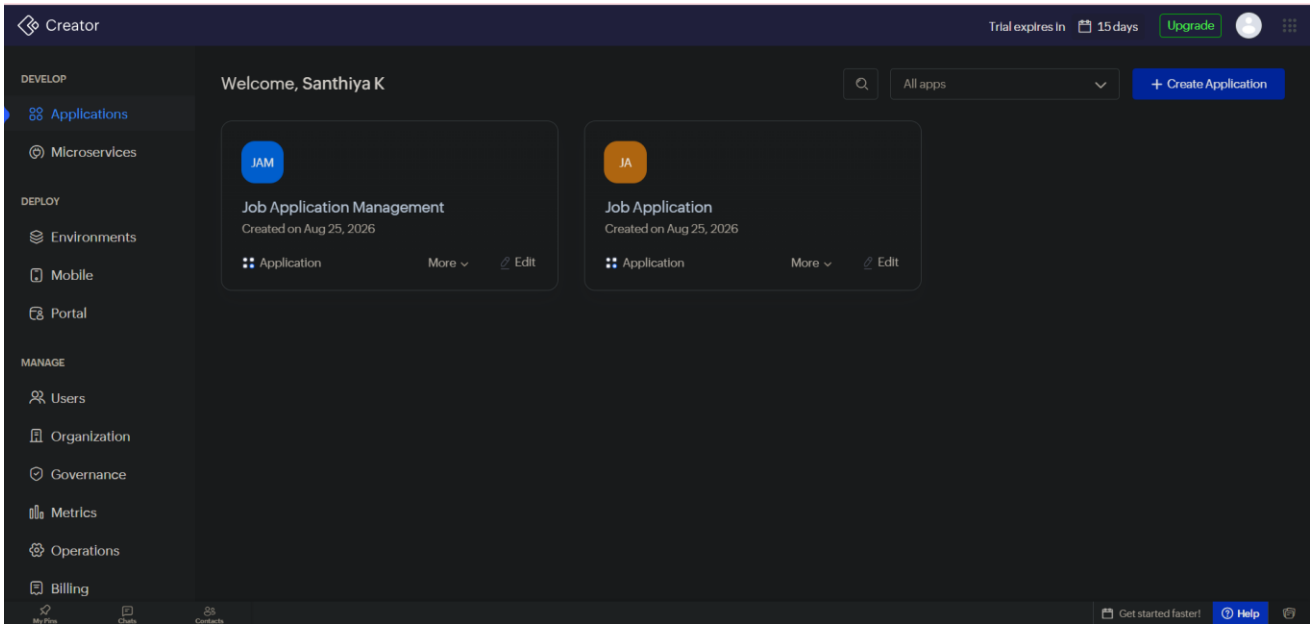

Aim:

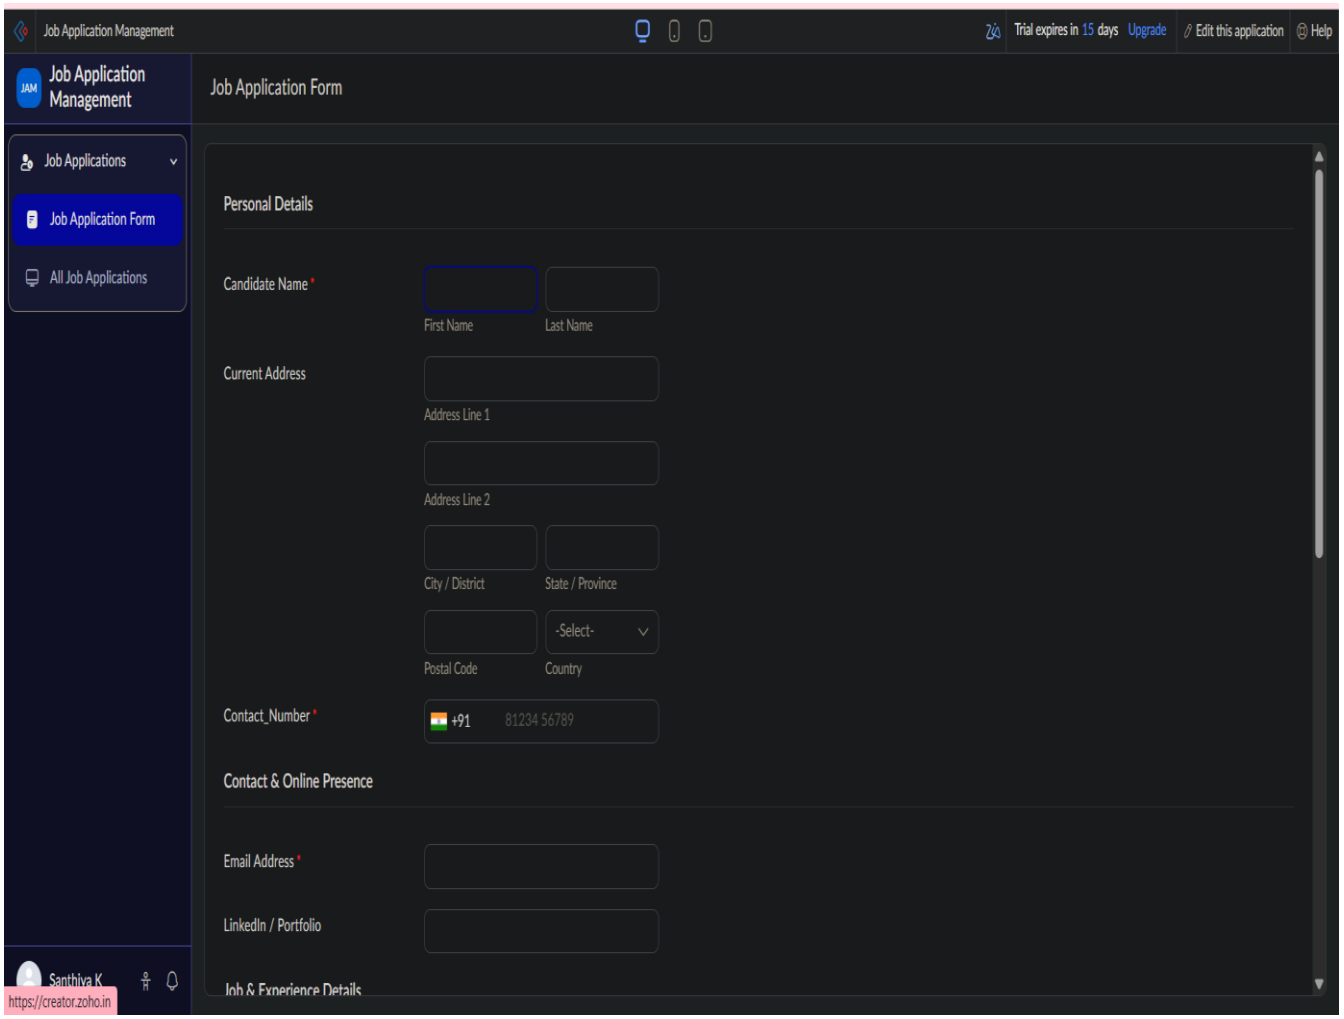

To create a Zoho Creator account, explore its interface, and understand the basic features required to develop a **Job Application Management System**.

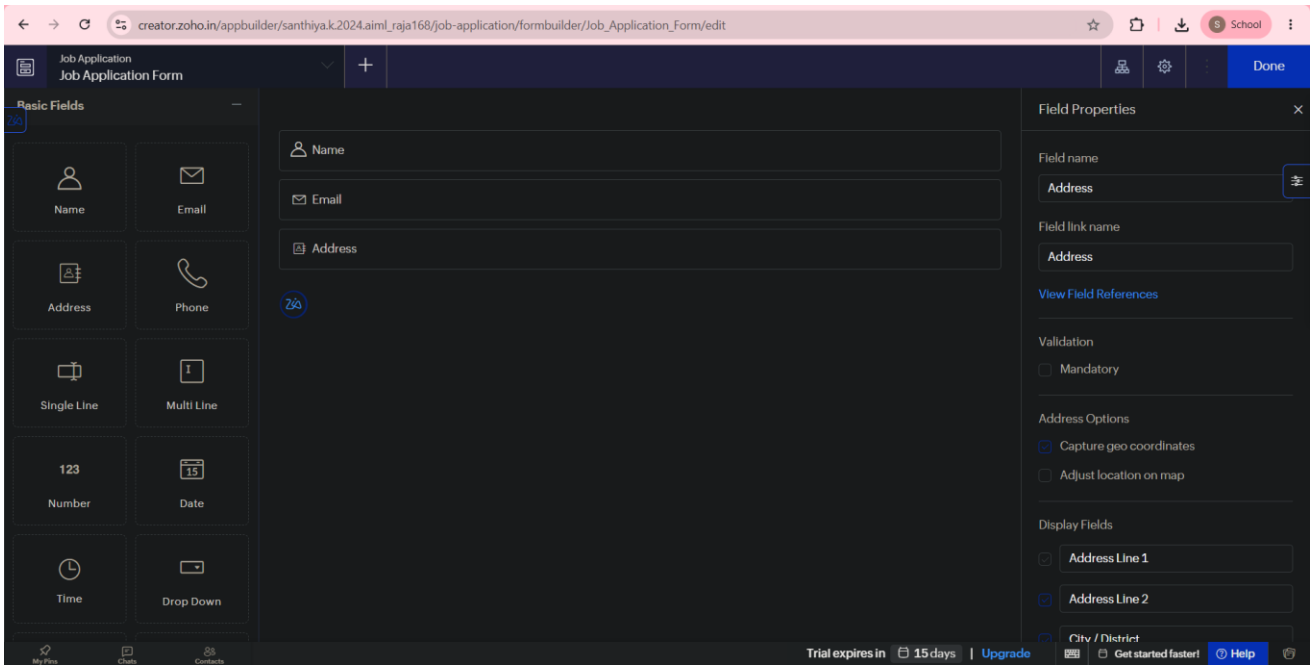

Procedure:

1. Opened the Zoho Creator website and signed in.
2. Created a new Blank Application.
3. Named the application **Job Application Management System**.
4. Opened the application dashboard.
5. Created a new form named **Job Application Form**.
6. Added fields required to collect job applicant details such as **Applicant Name, Email Address, Contact Number, Address, Educational Qualification, Skills, Work Experience, Preferred Position, and Additional Remarks**.
7. Created a workflow for the Job Application Form to trigger after a successful form submission.
8. Configured an email notification action to acknowledge the successful submission of a job application.
9. Explored the **Dashboard, Forms, Reports, Pages, Workflows, and Settings** sections.
10. Saved the application and verified that the **Job Application Form** and workflow were created successfully.

Observation:

- Zoho Creator account was created successfully.
- A **Job Application Management System** application was created.
- The **Job Application Form** was designed using drag-and-drop fields.
- A workflow was configured to send an email notification after successful form submission.
- The platform interface and basic development tools were explored successfully.

Conclusion:

The experiment helped in understanding the Zoho Creator interface and creating a basic **Job Application Management System**. The platform made it easy to design and develop a job application form using drag-and-drop components and configure workflow-based email notifications with minimal coding.
