EXP.NO: 4 — Data Modelling and Form Design

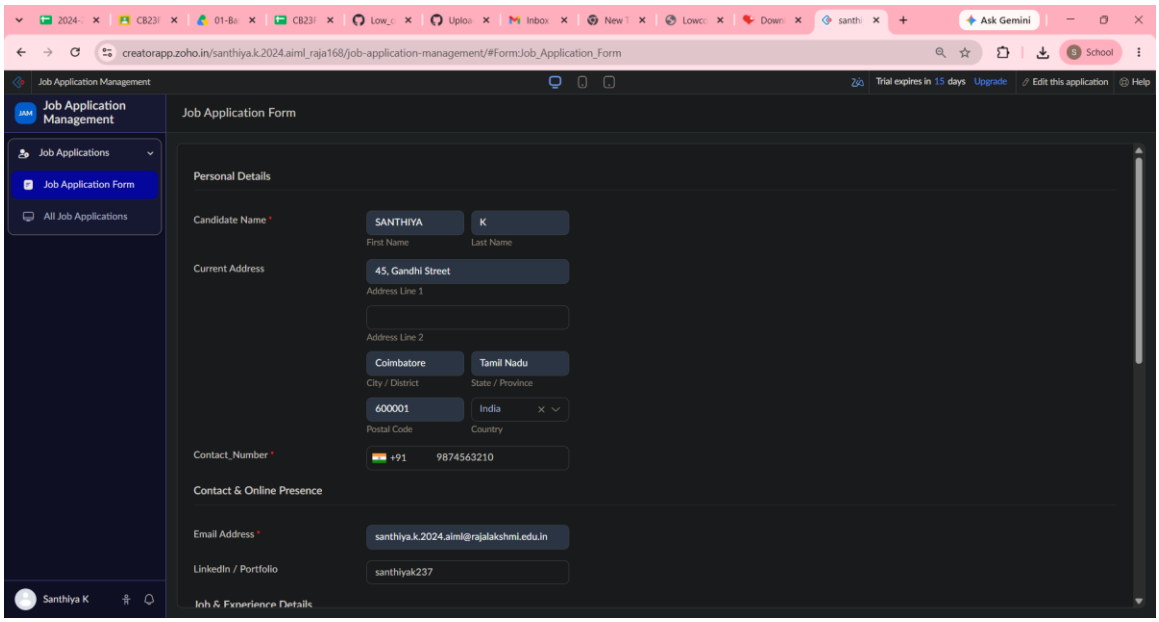

Aim:

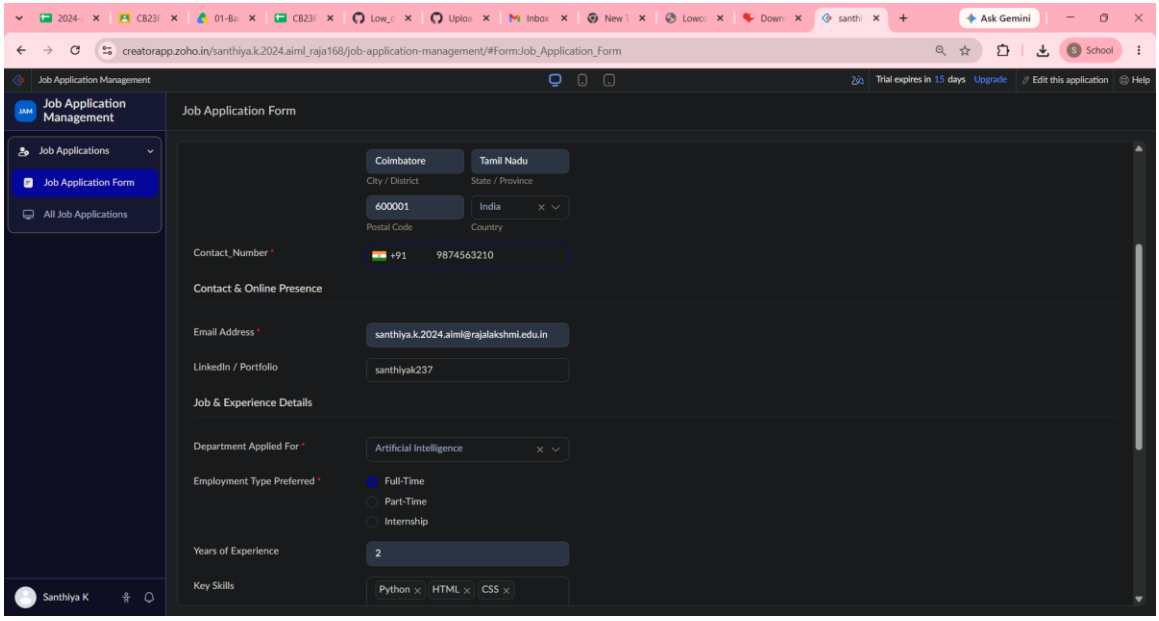

To design the data model and create forms for the Job Application Management System using Zoho Creator.

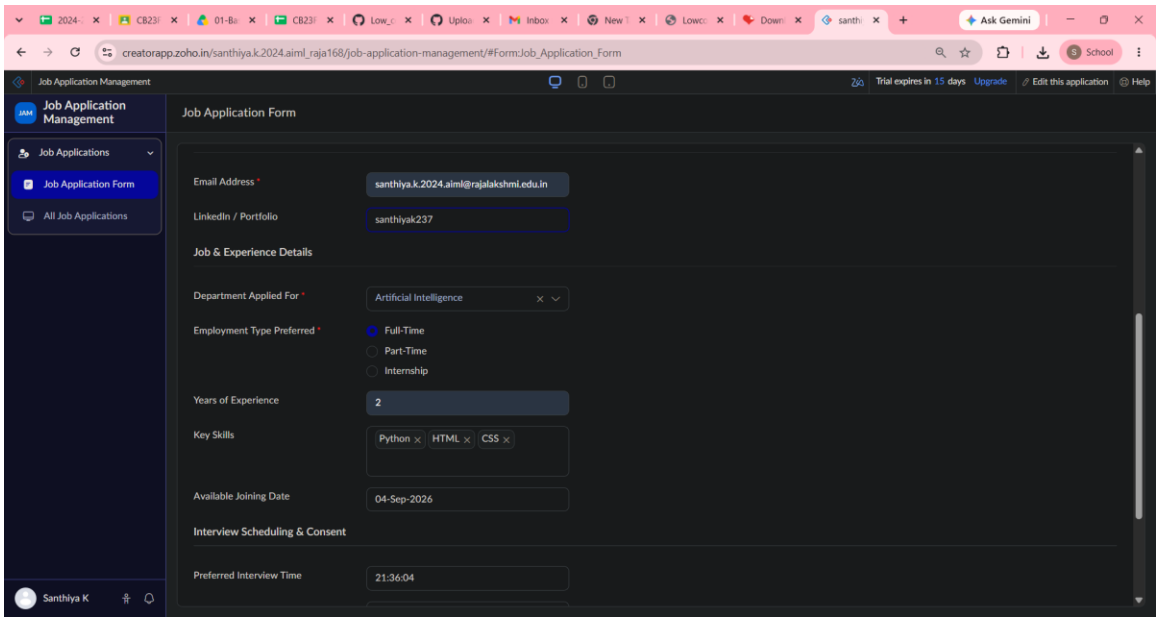

Procedure:

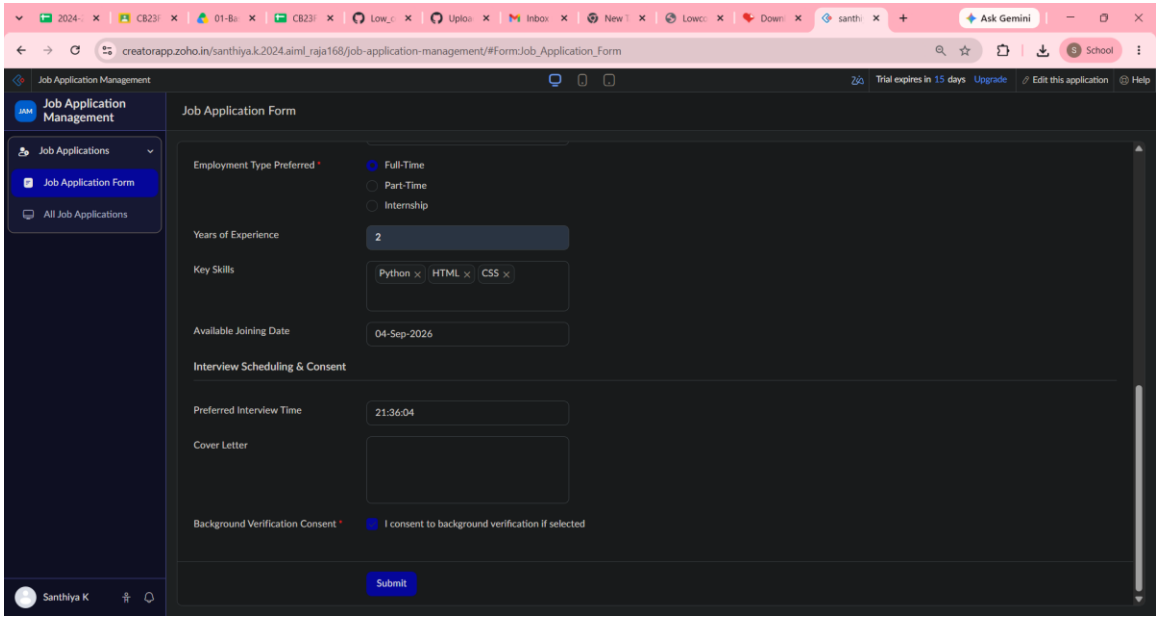

1. Logged in to the Zoho Creator account.
2. Opened the Job Application Management System application.
3. Created and opened the Job Application Form using the drag-and-drop Form Builder.
4. Added personal and contact-related fields such as Applicant Name, Email Address, Phone Number, and Address.
5. Added education and employment-related fields such as Educational Qualification, Skills, Work Experience, Preferred Position, and Additional Remarks.
6. Organized the fields into appropriate sections for better form structure and readability.
7. Configured the required field properties and validation rules.
8. Added validation to ensure that required applicant information was entered correctly.
9. Configured the Email Address field to accept a valid email format.
10. Added a Terms and Privacy checkbox to obtain confirmation from the applicant.
11. Created the Job Application Report to view and manage submitted job application records.
12. Entered sample applicant data and verified that the records were stored successfully.
13. Checked that the form fields and validation rules worked correctly.

14. Saved the application and confirmed the successful creation of the job application data model and form.

Observation:

The Job Application Form and Job Application Report were created successfully using suitable field types. The form collected personal, contact, educational, and employment-related details in an organized manner. Validation rules helped ensure that valid data was entered, and the submitted records were stored successfully in the application.

Conclusion:

The experiment demonstrated how Zoho Creator simplifies data modelling and form design through its visual drag-and-drop interface. The Job Application Form was successfully designed with appropriate fields, sections, validations, and reporting capabilities, providing an organized structure for the Job Application Management System.
